

Bari Patan Yantra

Material: Copper and bamboo

Description: This is an equipment for aroma extraction by the process of hydro-distillation.

Use: The aromatic plant parts are heated in water in the big closed vessel on an earthen oven. The aroma-laden steam flows through the bamboo pipe to the long throated vessel kept on a water bath where it gets stored after condensation.

Used by: People of Chamoli district in Garhwal region, Uttarakhand, India, in the Central Himalayas.
